Education

Wilfrid Laurier University **Expected Graduation: Aug 2028**

Hons. Bachelor of Science in Computer Science and Mathematics (Co-op) *Waterloo, ON*

- Dean's List — **GPA: 10.62/12 (3.8/4.0)**
- Courses: Computer Networks, Databases I, Operating Systems, Software Engineering, Data Structures I & II, Object-Oriented Programming, Introduction Microprocessors, Discrete Mathematics, Regression Analysis, Probability I

Technical Skills

Languages: Python, Java, SQL, C#, HTML, CSS, R, JavaScript, C, TypeScript, Ruby

Frameworks: Ruby On Rails, Django, Express.js, ASP.NET, React.JS, React Native, Flask, Blazor, TailwindCSS

Databases & Tools: AWS (EC2), Docker, GraphQL, PostgreSQL, MS SQL Server, MySQL, Pi, Codex

Work Experience

Shopify **Sep 2026 – Dec 2026**

Software Engineer Intern *Toronto, ON*

- Interning with the On Ramps, Digital Products team Fall 2026

Giesecke+Devrient **May 2025 – Aug 2025**

Software Developer Intern *Markham, ON*

- Interned with Giesecke+Devrient's customization department, contributing to internal web projects, product validation tools, and developer workflow tools using **C#** and **MS SQL** to improve development efficiency and product reliability.
- Developed an environment synchronization web admin dashboard with **ASP.NET** and **Blazor**, assisting **30+** developers to maintain consistency across **500+** clients and improving card file synchronization by **30%**.
- Integrated a caching layer into the admin dashboard, decreasing load times by **45%** and optimizing data retrieval.
- Pioneered an automated regression testing tool integrated with a version control system for card output files, enabling developers to log results, store files, and set smoke tests to streamline workflows.
- Reduced QA validation time by **70%** by developing a web-based auditing platform that automated verification workflows for **1,000+** card types using **SQL stored procedures** and **Regex**.

Stanford University **Apr 2026 – Jun 2026**

Section Leader *Remote*

- Taught Stanford's Code in Place CS106A course to students globally, taken by **16,000+** students worldwide.
- Educated students in **Python** leveraging beginner-friendly libraries such as Stanford's Karel and Tkinter effectively.

Wilfrid Laurier University **Sep 2025 – Aug 2026**

Mathematics Instructional Assistant *Waterloo, ON*

- Instructional Assistant for MA129 (Introductory Calculus for Business and Social Sciences) Fall 2025, MA121 (Introduction to Mathematical Proofs) Winter 2026, ST230 (Introduction to Probability and Statistics) Spring 2026.
- Supported **60+** students during weekly lab sessions, providing clear explanations by breaking down complex topics and reinforcing fundamental ideas to improve their understanding and problem-solving skills.
- Participated in weekly meetings to review course material, discuss labs, and address student learning challenges.

Projects

Cafe Passport **Django | PostgreSQL | ReactJS**

- Developed a Cafe Passport fullstack web application utilizing a **Django** backend and a **React** frontend and features a **PostgreSQL** database to manage cafe data, enabling users to explore, share, and bookmark locations.
- Utilized Django's ORM to design and implement database models, managing entities such as Users, Cafes, and Passport entries to ensure data integrity and optimize querying.
- Designed and implemented a custom authentication system atop Django's base user model, featuring **JWT-based** authentication for secure login and registration.

Tee Time **Next.js | Express.js | MongoDB**

- Built a full-stack golf tee time app with **Next.js**, **Express.js**, and **MongoDB** to let users filter and track tee times.
- Developed a **TypeScript**-based RESTful API, implementing secure authentication with bcrypt password hashing, direct database queries for managing tee times, and user-specific email alerts for booking updates.
